

BOATERS' ADVISORY

THESE WATERS ARE INFESTED WITH ZEBRA MUSSELS

Zebra Mussels vary from 1/8 to 2 inches long and have a yellow-brown shell with alternating color bands. This mussel is prolific and can form colonies of thousands on your boat hull or any submerged hard surface.

TO PREVENT DAMAGE TO YOUR BOAT OR TRANSPORTATION TO NON-INFESTED WATER, PLEASE FOLLOW THESE GUIDELINES.

1. Drain the bilge water, live wells, and bait buckets.
2. Inspect the boat and trailer for attached Zebra Mussels.
3. Scrape off any Zebra Mussels.
4. Dry boat and trailer for 1 week before entering another waterway.

OR

1. Wash boat parts and trailer with 140°F water, a 10% chlorine and water solution, or a hot saltwater solution. Do not wash at ramp.
2. Finish with a clean water rinse.
